

CIRCLE
CleanTech Cluster e.V.

A new, interdisciplinary **CleanTech Cluster** is being established in Thuringia. The aim is to guide and support cross-sector and cross-technology collaborations between **SMEs, large companies, research institutions, trade associations** and **policymakers**.

Added Value for Members - Creating Impact Together

New Opportunities for Collaboration

A cross-disciplinary environment with partners from industry, academia, and the professional world

Strong connections along the value chains

A broad network with tailored offerings to tap into market potential

Project Support

Guidance for innovation projects, from idea development to implementation

Support in finding partners and project management

Early Information & Visibility

Up-to-date information and increased participation in the network

Regional, national, and international visibility of the cluster

Knowledge and Exchange

Events involving industry, academia, and government

Coordinated participation in national and international committees (advisory boards, norms and standards)

Guidance on Funding Opportunities

Identification of suitable funding programs (at the state, federal, and EU level), and referral to relevant contacts
